2. The following is an examiner's statement of reasons for allowance:

Regarding claims 3, 5, 7, 10, 12, the prior art of record fails to teach a controlled apparatus transmitting an inhibiting instruction signal for inhibiting a remote controller from repeatedly transmitting the control signal if the control signals are the same control signals.

Regarding claims 13-16, the prior art of record fails to teach or suggest a determination device in a remote control for determining whether the control signal is suitable for repeated control when an acknowledgement signal indicative of reception of control signal is returned from the controlled apparatus in order to allow or inhibit repeatedly transmitting the control signal.

Regarding claims 4, 8, these claims are allowed as being dependent upon independent claims that have been allowed.
